Birds of Dyke Marsh Bellehaven and Hunting Creek

Names and order follow the
Seventh A.O.U. Checklist, prepared by the
Friends of Dyke Marsh

The seasonal occurrence for birds observed at
Dyke Marsh is coded as follows:

s - Spring (March-May),
S - Summer (June and July),
F - Fall (Aug to mid-Nov),
W - Winter (mid-Nov to Feb).

* indicates species which nests or has
nested in recent years
I - indicates irruptive species

Relative Abundance Codes:	
a:	Abundant, observed nearly every time in large numbers in suitable habitat
vc:	Very Common, observed nearly every time in suitable habitat
c:	Common, observed over 75% of the time in suitable habitat
u:	Uncommon, observed about 50% of the time in suitable habitat
vu:	Very Uncommon, observed about 25% of the time in suitable habitat
r:	Rare, not observed every year in suitable habitat
vr:	Very Rare, not present every year in suitable habitat
